Luxury acoustic panels made with
Crystals from Swarovski®

JEWELRY-INSPIRED ACOUSTICS

*Merging the sophistication of artisan fine jewelry
with the precision of acoustic engineering.*

Espacio HIKARU designed by Soledad Ordoñez Giordano

Marbella Design and Art 2023 - awarded
Second prize for technological innovation 2023

The definition of “luxury” is undergoing a renewal.

In the past, luxury was a word derived from the external impression of extravagance, opulence, or even flaunting one’s riches. Now, a new element of “internal value” has been added.

The redefined meaning of “luxury” can be expressed in a few words. The concept of luxury does not apply to expensive items that are only shown to show one’s status.

Luxury is recognized only when it contains intangible internal values and virtues, such as craftsmanship and brand history, not only to mention high quality and excellent design and technology.

We think the image of “luxury,” which tended to conjure up images of “ostentatious, rich, and flashy,” has been transformed into “history, sophistication, elegance, quality, and rarity”.

The meaning of the word “luxury” is now seen as an expression of a “way of life” that is not only stylish but also emotionally rich and radiant on the inside, as values have become more diverse.

We think that elegance is a set of values that goes to the core of our customers’ personalities and attitudes toward life.

Our products enable customers who hold these values to make them part of their lifestyle. Redefined luxury can be understood as a concept that meets the requirements of elegance.

We believe that people who freely pursue their own lifestyles, without being influenced by mere fads, are the ones who understand the essence of luxury.

We not only propose attractive items and excellent designs, but also introduce the craftsmanship and historical stories behind them, conveying the joy of ownership and experience in a deeper way.

HIKARU luxury acoustic panels.

La definición de “lujo” está experimentando una renovación.

En el pasado, el lujo era una palabra derivada de la impresión externa de extravagancia, opulencia o incluso ostentación de riqueza.

Ahora, se ha añadido un nuevo elemento de “valor interno”.

El significado redefinido de “lujo” puede expresarse en pocas palabras. El concepto de lujo no se aplica a los artículos caros que sólo son vistosos para mostrar el propio estatus.

El lujo sólo se reconoce cuando contiene valores y virtudes internas intangibles, como la artesanía y la historia de la marca, por no hablar de la alta calidad y el excelente diseño y tecnología.

Creemos que la imagen de “lujo”, que solía evocar imágenes de “ostentoso, rico y llamativo”, se ha transformado en “historia, sofisticación, elegancia, calidad y rareza”.

El significado de la palabra “lujo” se percibe ahora como expresión de un “modo de vida” que no sólo es elegante, sino también emocionalmente rico y radiante por dentro, ya que los valores se han diversificado.

Creemos que la elegancia es un conjunto de valores que van al fondo de la personalidad y la actitud ante la vida de nuestros clientes.

Nuestros productos permiten a los clientes que defienden estos valores hacerlos parte de su estilo de vida. El lujo redefinido puede entenderse como un concepto que cumple los requisitos de la elegancia.

Creemos que las personas que persiguen libremente su propio estilo de vida, sin dejarse influir por meras modas, son las que comprenden la esencia del lujo.

No sólo proponemos artículos atractivos y diseños excelentes, sino que también presentamos la artesanía y las historias que hay detrás de ellos, transmitiendo la alegría de la propiedad y la experiencia de una forma más profunda.

HIKARU luxury acoustic panels.

HISTORY

A company specializing in acoustic engineering founded in Malaga, Spain, in 1998, named Aistec, met for first time a handicraft company for shoe decoration established 36 years ago in a small town in Alicante, Spain, a village well known for its handcrafted shoemaker “made in Spain”.

The two companies combined their long-standing expertise in their respective fields and began to propose a new luxury acoustic panel. High quality acoustic panel, until then considered a rather industrial material, to be able to offer as a functional but at the same time stylish, decorative and beautiful element. The craftsman has long been involved in inlaying Swarovski® crystals into shoes and textiles for the high-end apparel industry. Each crystal is inlaid into the panel by hand, one by one, by craftsmen in Spain.

It is our pleasure to convey the joy of owning a fusion of sophisticated acoustic engineering and craftsmanship with original Swarovski® crystals, elevating the acoustic panels to the ultimate expression of elegance.

HISTORIA

Una empresa especializada en ingeniería acústica fundada en Málaga, España, en 1998, llamada Aistec, se reunió por primera vez con una empresa artesanal de decoración de calzado establecida hace 36 años en un pequeño pueblo de Alicante, España, un pueblo muy conocido por su zapatería artesanal “made in Spain”.

Las dos empresas combinaron su larga experiencia en sus respectivos campos y empezaron a proponer un nuevo panel acústico de lujo. Un panel acústico de alta calidad, hasta entonces considerado un material más bien industrial, para poder ofrecerlo como un elemento funcional pero al mismo tiempo elegante, decorativo y bello. El artesano se dedica desde hace tiempo a incrustar cristales de Swarovski® en zapatos y textiles para la industria de la confección de alta gama. Cada cristal es incrustado en el panel a mano, uno a uno, por artesanos.

Es para nosotros un placer transmitir la alegría de poseer una fusión de sofisticada ingeniería acústica y artesanía con originales cristales de Swarovski®, que elevan los paneles acústicos a la máxima expresión de la elegancia.

HIKARU®

Swarovski® Crystals Collection
CRYSTALS

The brilliance of each Swarovski® crystals comes from the exquisite and meticulous cutting of each piece. The hands of our craftsmen carefully place them in their precise point, resulting in an exclusive work of art. Hikaru obtains pieces that could well be a starry sky or a deposit of precious stones.

El brillo de cada cristal de Swarovski® proviene del tallado tan exquisito y cuidado de cada pieza. Las manos de nuestros artesanos las disponen con esmero en su punto preciso, creando así una obra de arte exclusiva. Hikaru obtiene así piezas que bien podrían ser un cielo estrellado o un yacimiento de piedras preciosas.

CRYSTAL FABRIC

Crystal fabric is a sublime reflection that transforms brilliance into an extraordinary expression of art. Each masterfully placed line is a portal to sensations and emotions that envelop you in an aesthetic embrace.

Crystal Fabric es el esplendor que transforma el brillo en una expresión de arte sin igual. Cada línea trazada con maestría es un portal hacia sensaciones y emociones que te envuelven en un abrazo estético.

Crystal Fabric is a silicone foil with embedded micro-crystals that can be cut according to your design proposal. Motifs or strips, the possibilities are endless.

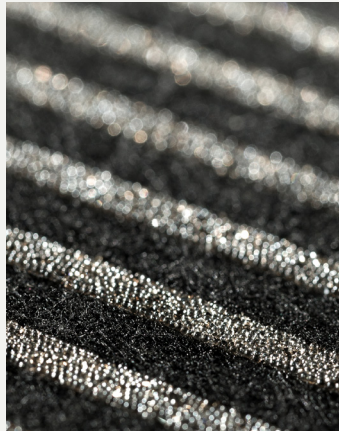

Crystal Fabric es una lámina de silicona con micro-cristales incrustados que se puede recortar acorde a la propuesta de su diseño. Los motivos o las tiras, las posibilidades que ofrece son infinitas.

ACOUSTIC ENGINEERING CERTIFICATES AND OUR SUSTAINABILITY

We believe that the richness of space is completed with acoustic conditioning. The importance of taking care of comfort improves our well-being. For this, in HIKARU we have the best absorbent Acoustic Panels, which guarantee an acoustic absorption coefficient of up to 0.95 Alpha Sabine, having a panel density of 192 kg/m³. We offer excellent acoustic performance and a textile-like finish.

HIKARU Luxury acoustic panels use materials that care for our ecological environment. They are panels without formaldehyde emission and comply with fire resistance standards, B-s2,do.

Certificados de ingeniería acústica y nuestra sostenibilidad

Creemos que la riqueza del espacio se completa con el acondicionamiento acústico. Queremos recordar la importancia de cuidar el confort para mejorar nuestro bienestar. Para ello, en HIKARU disponemos de los mejores Paneles Acústicos absorbentes, que garantizan un coeficiente de absorción acústica de hasta 0,95 Alfa Sabina, teniendo una densidad de panel de 192 kg/m³. Ofrecemos un excelente rendimiento acústico y un acabado similar al textil.

HIKARU Luxury acoustic panels emplea materiales que cuidan nuestro entorno ecológico. Son paneles sin emisión de formaldehído y cumplen con las normas de resistencia al fuego, B-s2,do.

CONTACT

If you are interested in Hikaru Luxury Acoustic Panel for your interior design project, please do not hesitate to contact us. We would like to offer you a HIKARU experience, so that you can see and touch samples of crystals and get to know the tones of the panels.

With a previous appointment with our staff, we will be pleased to attend you in our showroom in Malaga or Madrid, or through an individualized advice.

Si desea Hikaru Luxury Acoustic Panel en el diseño de su proyecto de interiorismo, no dude en ponerse en contacto con nosotros. Queremos ofrecerle una experiencia HIKARU, para que vea y toque muestras de cristales y conozca los tonos de los paneles.

Con cita previa a nuestro personal, le atendemos en nuestro showroom de Málaga o Madrid, o bien a través de un asesoramiento individualizado.
